

Water Treatment by Chemical Treatment

Which chemical I use (e.g., chlorine drops, tablets, liquid bleach recommended for water): _____

How much to add per liter (follow the label and recommended dose): _____

How long to wait before drinking (usually 30 minutes, sometimes with follow-boiling): _____

How to store chemicals safely (out of reach of children, in original container, in a cool, dark place): _____

Signs the water may still be unsafe (strong chemical smell, wrong color, presence of sediment): _____

If in doubt, consult a health worker or local guidelines.
