

BUILDING A MIND-WAKING MORNING

Wake your body. Clear your head.

Simple, consistent morning movements are medicine for your mind. A better way to start your day, clear and focused.

WHY MOVE IN THE MORNING?

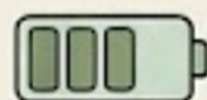

ENHANCES FOCUS

Reduces brain fog, releases mental clarity

BOOSTS MOOD

Releases 'feel good' neurotransmitters like dopamine

INCREASES ENERGY

Wakes up your metabolism and muscles naturally

SUPPORTS WELL-BEING

Reduces stress and regulates the nervous system

BUILDS INTENTION

Sets a proactive, present-moment time for the day

PROTECTS YOUR TIME

Prioritizes your mental health and physical readiness

YOUR MINDFUL MOVEMENT BLUEPRINT

Create a sequence that awakens your body and centers and centers your thoughts.

1

IN-BED STRETCH

A simple full-body reach or gentle knees-to-chest

2

DEEP BREATHING

Link 5 Seep, winiflal belly breaths to oxygenate the body

3

SPINAL TWIST

A gentle, lying down twist to release overnight back tension

4

CAT-COW POSE

Flipping the spine to create warmth and mobility

5

FORWARD FOLD

A loose, stand and to encourage blood flow to the head

6

LIGHT WALKING

A slow stroll through the home or garden ground yourself

7

OPENING POSES

Flipping spine to create warmth and mobility

It doesn't need to be a workout. It just needs to be gentle and mindful.

IDEAS TO KEEP IT SIMPLE

Start with 5-10 minutes.

Link to existing habits (e.g., after brushing teeth)

Focus on how you feel, not a goal.

Listen to your body and breathe.

Connect breath to distractions.

Stay present and avoid distractions.

Keep it consistent, not perfect.

Protect your morning routine.

MOVEMENT REMINDERS

Gentle movement.
More present.
Better day.
