

Physical Discomforts Linked to Emotional Stress

Where I feel tension

(head, neck, shoulders, chest, stomach,
lower back, etc.)

How often it appears

(daily, weekly, when stressed, no clear
pattern)

What happens just before it

(arguments, bad news, deadlines,
overthinking, social pressure)

One small thing I can do when I feel it

(pause, breathe, stretch, talk, rest)

When it might be time to see a clinician

(persistent pain, other worrying symptoms)
