

AI Symptom Tracker to Share With Your Therapist

Session 1

Daily Check-In

What day is it?

How am I feeling overall?

What is my energy level?

How anxious or calm do I feel?

What stands out most today?

Session 2

Symptoms I Noticed

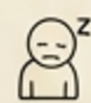

What symptoms showed up today?

Did I feel stressed, tense, or low?

Did I notice changes in sleep or appetite?

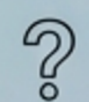

Did I feel physically drained or restless?

What felt most uncomfortable?

Session 3

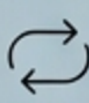

Triggers and Patterns

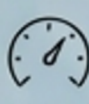

What may have triggered my symptoms?

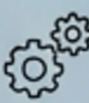

Did anything make me feel worse?

Did I notice a pattern in my mood?

When did symptoms feel strongest?

What tends to happen before this feeling?

Session 4

Coping and Relief

What did I do to cope?

Did anything help even a little?

Did I rest, talk, journal, or breathe?

Which coping tool felt most useful?

What comfort do I need more of?

Session 5

Progress and Support

Did anything improve today?

What stayed the same?

What support did I reach for?

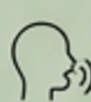

What support did I still need?

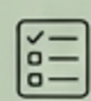

What would help me most next time?

Share With Therapist

What do I want my therapist to know?

What symptom matters most to discuss?

What pattern should we look at together?

What question do I want to ask?

What do I want support with next?

AI helps track, humans help heal.
